# 2. Current position

09/2022 – 08/2024 Postdoctoral researcher

Institute for Theoretical Physics, Goethe University Frankfurt

Advisors: L. Sagunski, J. Schaffner-Bielich

# 3. Employment history

05/2020 – 08/2022 Postdoctoral researcher

Helsinki Institute of Physics, University of Helsinki

Advisors: A. Vuorinen, K. Rummukainen

02/2017 - 04/2020 Doctor of Philosophy, PhD Physics (magna cum laude), 23/04/2020

AEC, Institute for Theoretical Physics, University of Bern

Advisor: M. Laine

Thesis: Multi-loop investigations of strong interactions at high temperatures, (cf. re-

updated: April 9, 2024

search output [4]).

10/2016 - 01/2017 Technical student

CERN, Accelerator and Beam Transfer, Beam Transfer Physics

Theoretical optimisation of slow extraction (cf. research output [6]).

Advisors: M.A. Fraser, M. Meddahi

06/2015 - 08/2015 Summer student

CERN, ABT, BTP

Thesis: Optimising simulation times of SPS slow extraction using MAD-X, (cf. research output [5]).

07/2014 - 08/2014 Summer student (GPA 1.0/1.0)

HEPHY, Institute of High Energy Physics, Vienna

Advisor: R. Schöfbeck

Thesis: Increasing the sensitivity of a search for supersymmetry in the single lepton channel with the Stransverse Mass  $M_{T2}$  (CMS), (cf. research output [1]).

#### 4. Education

07/2017 Ècole de physique des Houches

Effective Field Theory (EFT) in particle physics and cosmology

03/2017 Computer algebra and particle physics (CAPP) school, DESY, Hamburg

09/2014 - 11/2016 Master of Science, MSc Physics (GPA 5.5/6.0), 01/11/2016

ETH Zürich, Switzerland

Major: Theoretical high energy physics, lattice QCD, applied mathematics

Advisor: P. de Forcrand

Thesis: Inhomogeneous condensation in quark-based QCD effective models via

wavelet pseudoparticles, (cf. research output [3]).

07/2014 LAPP Annecy-le-Vieux, France

Summer School in Particle and Astroparticle physics

08/2013 Theoretical Physics Summer school, University of Utrecht, Netherlands

09/2011 - 08/2014 Bachelor of Science, BSc Physics (with distinction, GPA 1.1/1.0), 12/08/2014

Graz University of Technology, Austria

Advisors: H. G. Evertz, C. B. Lang

Thesis:  $\pi$ - and  $\rho$ -Meson mass spectroscopy from Lattice QCD, (cf. research out-

put [2]).

09/2002 – 05/2010 Österreichische Reifeprüfung, Matura (with distinction, GPA 1.0/1.0)

AHS BG/BRG Leibnitz, Austria

Major: Physics and geometry

Advisor: H. Scherz

Thesis: Sonoluminescence - A bubble's enlightenment. A theoretical and experi-

mental approach to the effect of Sonoluminescence.

## Teaching activities

Lectures 2023 -

Institute for Theoretical Physics, Goethe University Frankfurt

Theoretische Physik 1: Mathematische Ergänzungen

03/2022Phase transitions in the early universe (exercises)

Galileo Galilei Institute for Theoretical Physics

Theoretical Aspects of Astroparticle Physics, Cosmology and Gravitation

2022 -PhD thesis mentor,

Institute for Theoretical Physics, Goethe University Frankfurt

R. Diedrichs, 10/2022 – , supervised by L. Sagunski

D. Schmitt, 10/2022 – , supervised by L. Sagunski

2021 -MSc thesis supervisor,

Helsinki Institute of Physics, University of Helsinki

S. Vihko, 06/2021 - 03/2022, co-supervised with A. Vuorinen

Thesis: EFT methods and calculational techniques in imaginary time formalism of thermal QCD.

BSc thesis supervisor, 2022 -

Institute for Theoretical Physics, Goethe University Frankfurt

R. Baumann, 10/2022 - 09/2023, co-supervised with L. Sagunski, D. Schmitt

Thesis: Gravitational waves in the Abelian Higgs model

2013 -Teaching assistant

Institute for Theoretical Physics, Goethe University Frankfurt

Astrophysics II

AEC, Institute for Theoretical Physics, University of Bern

Standard Model 8832-FS2017-0

Quantum mechanics I 416542-HS2017-0

Quantum mechanics II 628-FS2018-0

7638-HS2018-0 Exercises in theoretical physics

430949-FS2019-0 Specialist course: Introduction to BSM physics

630-HS2019-0 Statistical thermodynamics II

# ETH Zürich, D-MATH/D-PHYS

401-1652-10L Numerical analysis I

Numerical methods 401-0654-00L

402-0063-00L Physics II Graz University of Technology, ITP/IEP

Theoretical mechanics, physics laboratory I/II

# 6. Event organisation

- 08/2024 Conference co-organiser, Strong and Electro-Weak Matter 2024, Goethe University Frankfurt
- 06/2024 Convener, 2nd Edition of the Workshop 'Quarkonia meet Dark Matter' (QMDM), Institute for Advanced Study, Technical University of Munich
- 01/2024 Conference co-organiser, Mainz-Frankfurt-Münster Cosmo Coffee, Mainz

#### 7. Outreach

09/2017 Public research display, University of Bern Nacht der Forschung (NdF)

### 8. Research visits

- 06/2023 CERN, Genève
- 12/2022 Kavli IPMU, Tokyo; G. White
- 09/2022 Jožef Stefan Institute, Ljubljana; M. Nemevšek
- 06/2022 SUBATECH, Nantes; J. Ghiglieri
- 10/2021 University of Basel; S. Antusch
- 10/2021 University of Bern, AEC, Institute for Theoretical Physics; M. Laine
- 08/2019 University of Helsinki, Helsinki Institute of Physics; A. Vuorinen, K. Rummukainen
- 08/2018 Universidad del Bío-Bío, Grupo de Cosmología y Partículas Elementales; Y. Schröder

## 9. Professional services

03/2022- Referee

American Physical Society's journals: Phys. Rev.  $\bf D$ , Phys. Rev.  $\bf L$  Springer's journals: Eur. Phys. J.  $\bf C$ 

#### 10. Scientific research skills

Theoretical (Dimensionally reduced) effective field theories, thermal field theory, quantum field theory, Lattice QCD, simulations in physics, computer algebra techniques, general relativity, cosmology, string theory, conformal field theory, group theory

Computational C/C++, Python, Matlab, FORM, ROOT, FORTRAN 77, Unix, Linux, Mathematica, LaTeX, computer hardware, HTML, Office, CAD-Software

# 11. Prizes, awards, fellowships

2024 – 2028 SNSF Ambizione Fellowship, Swiss National Science Foundation (SNSF) CHF 810k research grant

2011 – 2014 Scholarship of excellence Graz University of Technology EUR 2.4k scholarship

# 12. Languages

German Mother-tongue

English Proficient C2, TOEFL 106/120 (2014), Cambridge ESOL B2 First FCE (2010)

Spanish Intermediate B1

Danish Elementary A2

French Beginner A1

Latin Very good (literal translation)

### 13. Major scientific achievements

# Precision thermodynamics for cosmological phase transitions.

Invigorated by the first gravitational wave (GW) detections from binary mergers, I dedicated a large part of my first postdoc pushing the accuracy of the thermodynamics of cosmological phase transitions. In my first post-doctoral project, I assessed the theoretical uncertainties for cosmological phase transitions in [12]. The motivation for such a theoretical leap in precision was that leading-order (LO) calculations of thermodynamics are insufficient and render the GW spectrum ambiguous. An innocuous uncertainty at early stages has farreaching effects in the beyond the Standard Model (BSM) – GW pipeline and put successful stochastic gravitational wave background (SGWB) observations at LISA at risk before they even begin.

The work in [12] established the current state-of-the-art precision for GW predictions. This level of precision was achieved by using methods of dimensionally reduced EFT to derive the Standard Model EFT (SMEFT) three-dimensional effective potential and its minimisation.

# Development of automated 3d EFT framework for thermal field theories.

To improve the overall understanding of such EFT computations, we put forward a didactic review on the robust approach to thermal resummation as a combination between perturbative and non-perturbative techniques [11]. By inspecting the (dynamical) real singlet extension to the Standard Model, I computed novel contributions to the parameters of the dimensionally reduced EFT at next-to-leading order (NLO) which will be applicable for future non-perturbative lattice studies of the model. While, we demonstrated that two-loop contributions in the matching and effective potential are substantial [13] for robust predictions of the thermodynamic phase transition parameters, we also devised a minimal setup [17] that combines gauge invariance and resummation and supersedes a previous scheme.

In this context, I automated the evaluation and reduction of analytically challenging sum-integrals at non-zero temperature. The automation via the corresponding Mathematica package DRalgo [21], is now successfully applied not only in QCD but also in the most accurate predictions of gravitational waves from cosmological first-order phase transitions in generic BSM theories.

## Gauge-invariant framework for nucleation at finite temperature.

Theoretical uncertainties when determining the finite-temperature nucleation rate of bubbles of the new stable vacuum are still substantial. Especially in the context of radiatively induced transitions, I resolved a long-standing problem related to the unphysical gauge-dependence of the bubble nucleation rate. By employing effective theories at the nucleation scale for the Abelian Higgs model, I demonstrated for the first time [18, 15] gauge invariance of the leading order (LO) perturbative contributions in radiatively induced transitions.

### Research output list

If not specifically indicated otherwise, the following research list is in alphabetical order. In all subsequent research output, I contributed at the level of first or second author, conducted the computations, (co-)led the writing, and developed the main ideas of the project.

# Invited talks at workshops

- 19/03/2024 Strong cosmological phase transitions through the EFT lens, invited planary talk at Quarkonia meet Dark Matter at Institute for Advanced Study, Technical University of Munich, Germany
- 05/12/2022 EFT framework for (precision) cosmological phase transition thermodynamics, invited **planary** talk at What the heck happens when the Universe boils? at Kavli IPMU, Tokyo, Japan

#### Contributed talks

- 14/09/2023 Phase transition thermodynamic parameters at high precision, contributed talk at 26th International Conference on Particle Physics and Cosmology (COSMO'23), Madrid, Spain
- 11/07/2023 Degenerate fermionic matter at  $N^3LO$ , contributed talk at ELEMENTS Annual Conference, Bad Nauheim, Germany
- 03/07/2023 Can EFT reveal if there was an electroweak phase transition?, contributed talk at Cosmology from Home
- 22/06/2023 PRECLISA. Gravitational waves from cosmological phase transitions: Precision cosmology in the light of LISA, interview talk for the Ambizione grant of the Swiss National Science Foundation, Bern, Switzerland

- 17/05/2023 Phase transition thermodynamic parameters at high precision, contributed talk at How fast does the bubble grow?, DESY, Hamburg, Germany
- 05/05/2023 Strong electroweak phase transition and simplified dark matter models, contributed talk at Progress on Old and New Themes in cosmology (PONT) 2023, Avignon, France
- 06/04/2022 (Non-)perturbative jet dispersion hot QCD, contributed talk at Quark Matter 2022, Kraków, Poland
- 30/03/2022 (Non-)perturbative jet dispersion hot QCD, contributed talk at Mini workshop: Phase transitions in particle physics, Galileo Galilei Institute, Firenze, Italy
- 29/03/2021 Soft thermal contributions to 3-loop gauge coupling, contributed parallel talk at FunQCD (online), Barcelona, Spain
- $\frac{28/06/2018}{Fun\ with\ thermal\ dimension-six\ operators}, \text{contributed\ parallel\ talk\ at\ SEWM\ 2018},\\ \text{Barcelona,\ Spain}$

### Seminar talks

- 23/11/2023 Impact of computational diligence on GW signals from phase transitions, invited seminar talk at Warsaw University, Poland
- $12/10/2023 \quad \textit{Impact of computational diligence on GW signals from phase transitions}, invited seminar talk at University of Basel, Basel, Switzerland$
- 19/09/2023 Impact of computational diligence on GW signals from phase transitions, invited seminar talk at Helsinki Institute of Physics, Helsinki, Finland
- 15/06/2023 Electroweak phase diagram at finite lepton number density, contributed talk at Thermal Field Theory meets Phenomenology, Uppsala, Sweden
- 30/05/2023 High-temperature effective field theories: Precision phase transition thermodynamics, seminar talk at HEP seminar, Université de Genève, Switzerland
- 10/05/2023 Integrating by parts at finite density, informal talk at the DMGW meeting, Goethe University, Frankfurt, Germany
- 25/01/2023 Degenerate fermionic matter at  $N^3LO$ , invited seminar talk at Gravitation and Cosmology seminar, Utrecht University, Netherlands
- 24/01/2023 What can EFT tell us about the electroweak phase transition?, seminar talk at CRC-TR211 meeting and Colloquium, Bielefeld University, Germany
- 08/11/2022 EFT framework for cosmological phase transition thermodynamics, seminar talk at the AstroCoffee, Goethe University, Frankfurt, Germany
- 13/10/2022 Degenerate fermionic matter at  $N^3LO$ , invited seminar talk (online) at S@INT seminar, INT, Seattle, USA

- 15/09/2022 (Gauge independent) Bubble nucleation rate at finite temperature, invited seminar talk at Jožef Stefan Institute, Ljubljana, Slovenia
- 24/08/2022 Can EFT tell us if there was an electroweak phase transition?, invited seminar talk at University of Graz, Graz, Austria
- 11/07/2022 Soft light-cone observables from electrostatic QCD, invited seminar talk (online) at the QCD theory seminar
- 07/07/2022 Degenerate fermionic matter at  $N^3LO$ , invited seminar talk at the Nuclear Physics Colloquium, Goethe University, Frankfurt, Germany
- 16/06/2022 Can EFT tell us if there was an electroweak phase transition?, invited seminar talk at SUBATECH, Nantes, France
- 31/05/2022 Electroweak phase transition: Combining thermal resummation and gauge invariance, invited seminar talk at NICPB, Tallinn University, Estonia
- 24/05/2022 Combining thermal resummation and gauge invariance for electroweak phase transition, invited seminar talk (online) at School of Physics and Astronomy, Monash University, Australia
- 03/03/2022 Effective theory approach to cosmological phase transitions, invited seminar talk at Instituto de Astrofísica de Canarias, La Laguna, Spain
- 28/10/2021 Gauge independent bubble nucleation rate at finite temperature, invited seminar talk at University of Basel, Basel, Switzerland
- 19/10/2021 Cosmological phase transition: Robust thermal resummation, invited seminar talk at University of Bern, Bern, Switzerland
- 13/05/2021 Cosmological phase transition: Robust thermal resummation, invited seminar talk (online) at KIAS, Seoul, South Korea
- 25/11/2020 How to be precise at the electroweak scale at finite-temperature, invited seminar talk (online) at Kavli IPMU, Tokyo, Japan
- 13/08/2019 3-Loop Gauge Coupling in Hot Yang-Mills, invited seminar talk at Helsinki Institute of Physics, Helsinki, Finland
- 28/08/2018 Fun with thermal dimension-six operators, invited seminar talk at Universidad del Bío-Bío, Chillán, Chile
